Education

University of Birmingham

Birmingham, England

MEng Computer Science/Software Engineering with a Year in Industry

2024 – current

Year 1 (Completed - 67%, 2:1, Credits: 120/120) – Artificial Intelligence, Mathematical and Logical Foundations of Computer Science, OOP, Computer Systems/Professional Practice, Data Structures and Algorithms, Theories of Computation.

Year 2 (Completed - 64%, 2:1, Credits: 120/120) – Modules include: AI 2, Databases and Web Programming, Functional Programming, Operating Systems and Systems Programming, Security and Networks, Software Engineering.

Woodford County High School (Grammar School)

Woodford Green, Redbridge

A-Levels: Further Mathematics - A, Mathematics - A, Computer Science - B

2022 – 2024

Beal High School

Woodford Bridge Road, Ilford, Redbridge

Achieved a range of 6-9s throughout my 10 GCSEs, including Maths (9), English (8), Comp Sci (8)

2017 – 2022

Awarded top student in Geography and Design Technology. Selected as student of the month in Geography.

Work Experience

Computer Science Tutor

March – April 2023

Woodford County High School

Woodford Green, Redbridge

- Developed and customized teaching modules to accommodate diverse learning styles.
 - Designed targeted exam booklets and corresponding mark schemes for Computer Science GCSE students to support their progression toward target grades.
 - Organized materials by topic based on areas where students struggled, allowing peers facing similar challenges to focus on and practice those specific concepts.
-

Certifications

Python Bootcamp (Udemy)

- Completed 100+ lessons covering object-oriented programming, file handling, debugging and data structures.
- Built projects including a Tic-Tac-Toe game and practical Python applications.

AI for Everyone (DeepLearning.AI)

- Completed a 4-week course covering AI fundamentals, machine learning workflows, AI project evaluation, ethics and bias.
 - Learned the end-to-end ML lifecycle from data collection to deployment.
 - Developed understanding of AI applications, data science workflows and cross-functional AI teams.
-

Professional Development

Java Programming (Programming with Mosh)

- Learned Java syntax, OOP principles, exception handling and collections.
- Developed small console applications including a calculator.

SQL (W3Schools)

- Designed small relational databases and practised SQL queries, joins and data manipulation.

C Programming (W3Schools & Bro Code)

- Learned programming fundamentals including functions, arrays, pointers, loops and memory management.
-

Projects

NeighbourLink – Software Engineering Group Project (71%)

- Led the design of the application's frontend, defining the overall user interface, page layouts and navigation to ensure a consistent user experience.
- Developed the report feature and implemented a site-wide dark mode across all webpages, improving accessibility and maintaining a consistent visual design.
- Collaborated within a seven-member team using Git feature branches and pull requests to integrate reports, events, user authentication and aid request functionality.
- Evaluated the completed prototype and proposed enhancements for a second iteration, including notifications, mutual aid improvements, chatbot functionality and external API integration.
- **Technologies:** TypeScript, HTML, CSS, Node.js, Express.js, PostgreSQL, REST APIs, Git.

Solitaire Desktop Application – A-Level Computer Science NEA (57/70)

- Engineered a Python desktop application featuring a secure user authentication system, customisable interface and persistent data storage.
- Developed account creation, login and password recovery functionality using SQLite with robust input validation.
- Designed an intuitive user interface with configurable themes, card customisation, audio settings and player statistics to improve usability.
- Produced comprehensive technical documentation covering requirements analysis, stakeholder consultation, system design, pseudocode, testing and evaluation, following the complete software development lifecycle.
- **Technologies:** Python, Pygame, SQLite, Tkinter.

Technical Skills

Programming: Java, Python, C, SQL, HTML, CSS, JavaScript, TypeScript

Technologies: Node.js, Express.js, REST APIs, PostgreSQL, SQLite, Supabase

Concepts: Object-Oriented Programming, Data Structures & Algorithms, Software Engineering, Artificial Intelligence, Database Design, Operating Systems, Computer Networks, Functional Programming

Tools: Git, GitHub, VS Code, IntelliJ IDEA, CLion, Eclipse, LaTeX

Personal Development

Skills: • Teamwork – Attended scheduled meetings, met deadlines, and collaborated effectively.

• Tutoring & Communication – Adapted explanations to learning styles and mentored peers.

• Strategic Project Planning – Organized booklets by topic, showcasing planning and project management.

Hobbies: • Swimming (8 years of consistent practice), Gym (Daily workouts demonstrating discipline)

• Programming languages learnt/learning: C, HTML/CSS, Java, LaTeX, Python, SQL

• Languages: English, Gujarati, Hindi (understand), Spanish (learning)
